Links between Ray Adams and others involved with the phone hacking scandal

After the allegations made in [Panorama's Murdoch's Pirates](#) an eagle eyed Something Awful forum member Daveman23 noted some interesting links between various individuals involved with groups and individuals mentioned in the Panorama documentry, including Ray Adams, former head of security of the Murdoch subsidiary NDS, that’s well worth a read:

That would be former Scotland Yard commander Ray Adams (and Head of Criminal Intelligence - organised crime basically) working for NDS as Head of Security. That's the same Ray Adams who is accused of interfering with the Stephen Lawrence inquiry and investigated for misconduct over his links with drug dealer, murderer and police informant Kenneth Noye and his associate Clifford Norris, father of David Norris (now in jail for Stephen Lawrence's murder). The report into corruption relating to Mr Adams was withheld from the Macpherson report into the murder.

Also the same Ray Adams whose friend DC Alan "Taffy" Holmes shot himself in 1987 whilst Ray was being investigated by a police corruption inquiry. DC Holmes was the policeman working with murdered private detective Daniel Morgan on a whistleblowing case against corruption in the Met (allegations from Gillard and Flynn's "The Untouchables"). Daniel Morgan's murder inquiry in 1987 also seems to have suffered from NI "interest", involving the surveillance of the wife of the chief investigating officer.

Daniel Morgan's business partner, Jonathan Rees, was acquitted of Mr Morgan's murder in 2011 alongside the Vian brothers and James Cook. Another police officer, Sid Fillery, was arrested at the time but later released. Mr Fillery went to take over Mr Morgan's job at Southern Investigations. Mr Fillery also had charges of perverting the course of justice dropped but was later convicted on 15 counts of making indecent images of children.

Mr Rees was being paid by News International to the tune of around £150,000 a year and shared a business address with former senior NI executive (and Northern Ireland editor) Alex

People's Militia of the DPR

🌟🕒🌟 Emergency statement of the official representative of the NM DPR

!! Emergency message!

▼ In the Gorlovsky direction, the servicemen of the NM DPR prevented an attempt by an enemy sabotage group to penetrate the territory of the Donetsk People's Republic.

! Along the forest belt near the settlement ZELEZNAYA BEAM our observers revealed the movement of two special purpose groups of VFU in the amount of 10 and 12 people. Our defenders were forced to open fire from on-duty weapons. The enemy suffered losses of at least TWO militants killed, THREE wounded and was forced to retreat.

! According to our reconnaissance, the saboteurs planned to blow up a container with chlorine in the territory of a sewage treatment plant near the city of Gorlovka.

▼ At the site of the clash, foreign-made personal protective equipment and ammunition, as well as an action camera mounted on a bulletproof vest, were found. Apparently, with the help of it, the militants planned to provide their leadership with confirmation of the completion of the task.

◆ As evidence of the criminal intentions of the Ukrainian side, we present footage from this camera to your attention.

◆ Shortly before the clash, we intercepted the conversations of saboteurs in Polish. We have previously reported on the participation of Polish mercenaries on the side of Ukrainian militants.

! In addition, according to information received from the Ministry of State Security of the DPR today, at about 4.00 in the morning in the city of Gorlovka, a group of Ukrainian saboteurs attempted to blow up an ammonia storage tank at the Stirol plant. During the attack, a security guard of the enterprise, who discovered a group of saboteurs, was wounded. He received medical assistance, there is no threat to life.

◆ Special services are working at the scene.

◆ We appeal to the world community and representatives of international organizations, asking them to give a critical assessment of the criminal actions of the Ukrainian side.

◆ The armed formations of Ukraine are purposefully trying to sow fear and panic among the civilian population of the Republic and for this purpose they choose vital civilian objects for strikes.

! Just in the morning, the Armed Forces of Ukraine carried out attacks on the oil depot in the area of the settlement. ELENOVKA, to the sewage treatment plant and the Stirol plant in Gorlovka, and also put out of action TWO transformer substations.

!! The above facts are direct confirmation of the preparation of the Ukrainian side to unleash hostilities.

Mock Admissibility Hearing

Putting Principles into Practice: Mock Admissibility Hearing on Open Source Evidence

Putting Principles into Practice: Mock Admissibility Hearing on Open Source Evidence

**Friday 19th Feb
3:30-5:30pm**

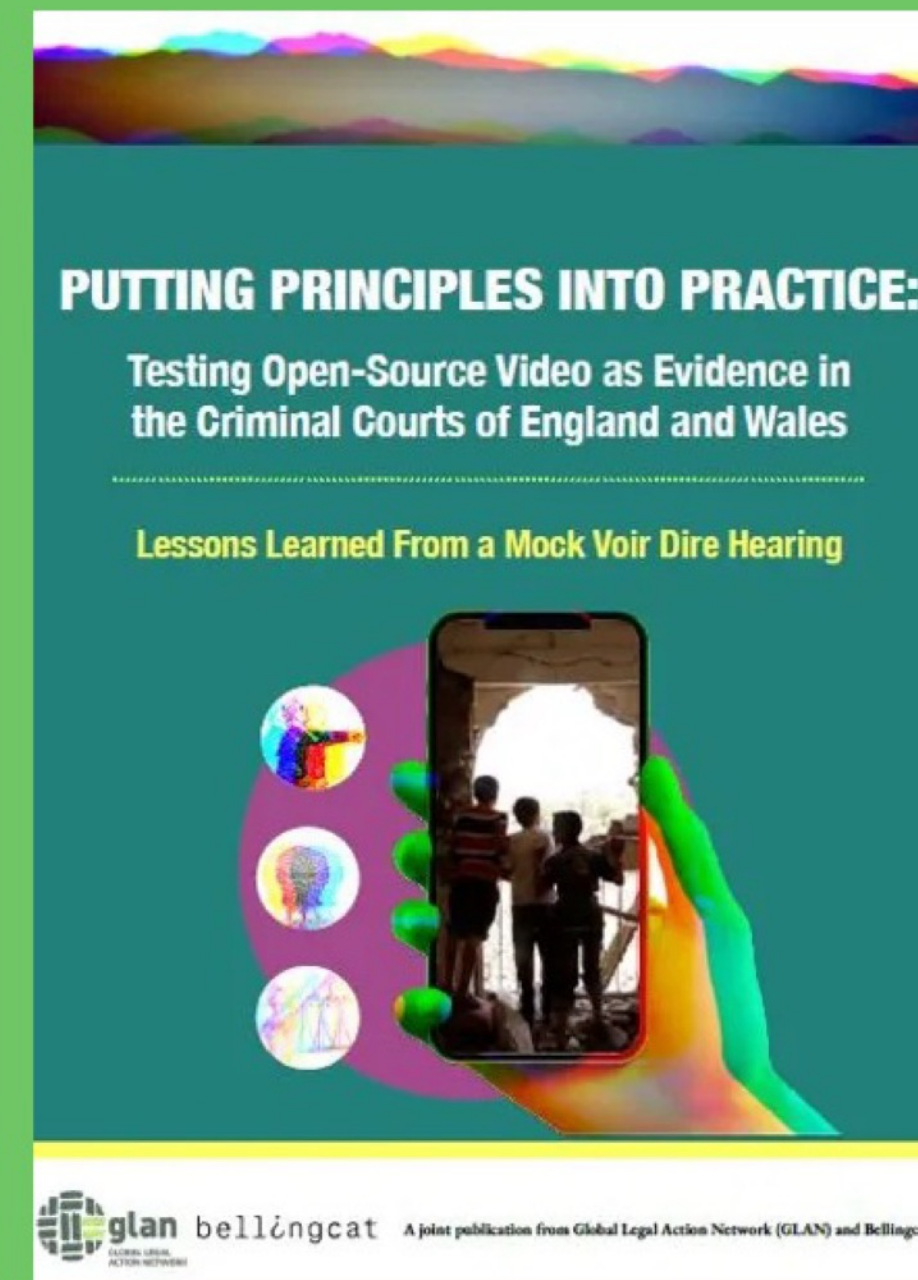

The banner includes the logos for GLAN (Global Legal Action Network) and Bellingcat, and five individual portraits of the speakers.

Digital open source information can provide vital information to supplement traditional forms of evidence, particularly in contexts where such evidence may not be readily available or accessible, such as in the ongoing conflict in Yemen. In the context of our work on accountability for violations of international law in Yemen, GLAN and Bellingcat have designed a methodology for the collection and preservation of digital open source information, with the aim of increasing the likelihood of this evidence being admitted and given due weight in criminal proceedings. Issues surrounding the admissibility and weight of digital open source information have not yet been fully tested in the courts of England and Wales.

REPORT #1

Open-Source Video as Legal Evidence

This report provides an account of a mock hearing under the jurisdiction of English law, in February and March 2021 on the admissibility of an open-source video depicting the aftermath of a Saudi/UAE-led coalition airstrike in Yemen and the impact of a second attack.

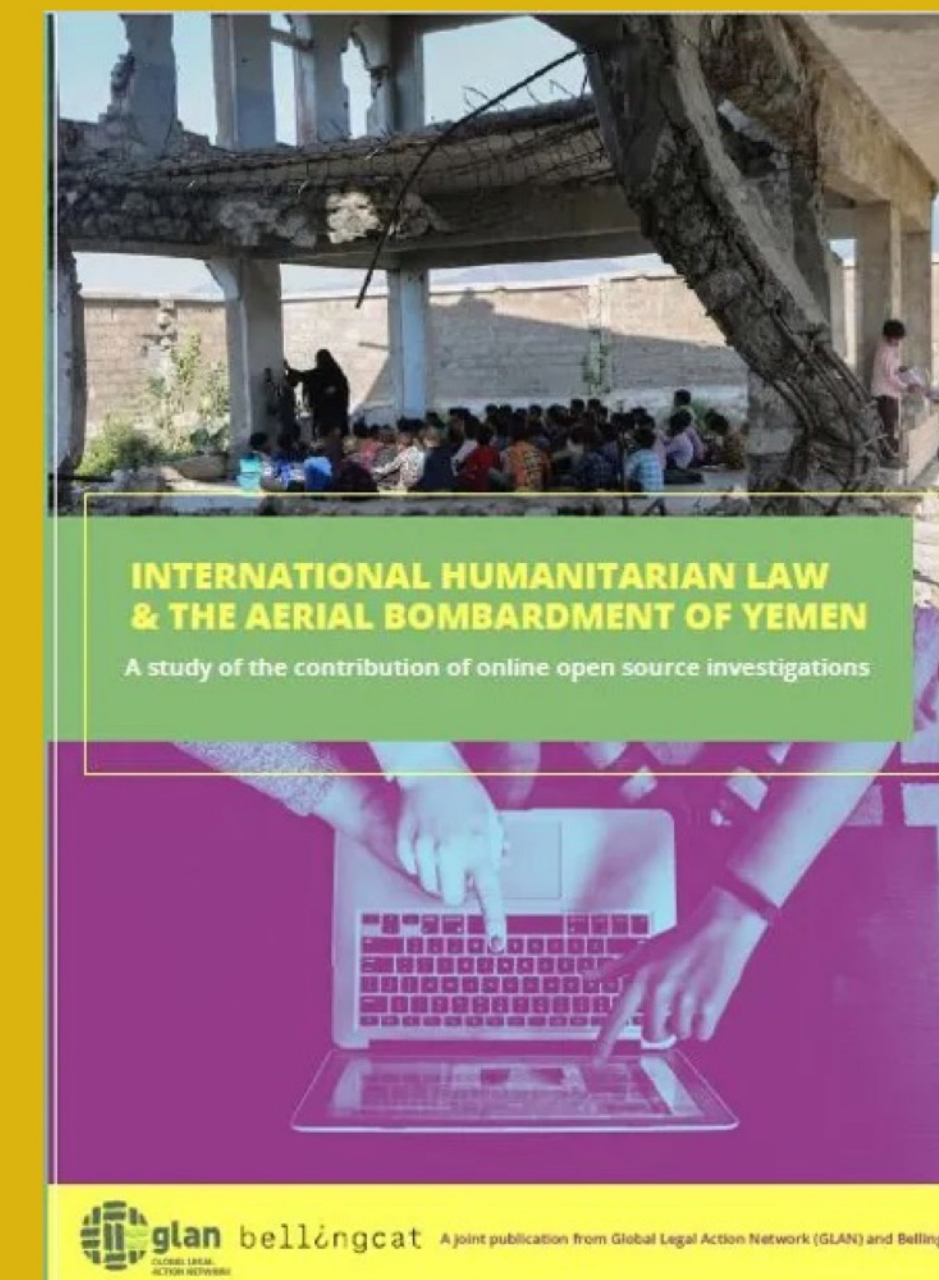

Download

REPORT #2

Open-Source Investigations & The Laws of War

This report is the product of sustained analysis of online open-source investigations on airstrikes in Yemen from the point of view of IHL, supported by members of the Advocates for Human Rights at Harvard Law School.
